Disclaimer

This directory is provided by the Missouri Department of Agriculture and the University of Missouri Outreach & Extension solely to assist aquaculture producers, businesses and consumers with locating information pertaining to Missouri aquaculture. Listing does not imply endorsement for any particular business, product, or service. Contact the Missouri Department of Agriculture or University of Missouri Outreach & Extension for assistance in buying aquaculture products or in investing in an aquaculture business. Information contained herein is believed to be accurate as of the date of publication.

ABOUT THE MISSOURI AQUACULTURE DIRECTORY

The Missouri Aquaculture Directory is a listing of businesses, organizations, and agencies that constitute the state's diverse aquaculture industry. This booklet includes producers of finfish, crustaceans, and plants; as well as processors, fee fishing operators, feed and equipment suppliers, consultants, and information resources that support Missouri aquaculture. Complete contact information for these businesses and agencies is listed in the index.

Business and contact names are listed in two sections according to the aquaculture livestock they produce or the types of products and services they offer. In the "Aquaculture Products" section, individual producers are listed with the corresponding species they produce under categories based on sizes and types of their aquaculture livestock (e.g. fingerlings, foodfish, ornamentals). Producers of aquatic plants are also listed in this section. The "Products and Services" section lists individuals under multiple categories (e.g. feed suppliers, processors, consultants). Species information is also listed in the fee fishing section under "Products and Services."

The list of species abbreviations is not comprehensive of all aquatic livestock grown in Missouri, but includes almost all of that which is produced in Missouri. Species are listed by both scientific family and alphabetical by abbreviation for easy location. To find an abbreviation for a certain species, use the family listing. To find the name for a certain abbreviation, use the alphabetical listing. Species that are marked with an asterisk (*) are not included on the "Approved Species List" prepared by the Department of Conservation. Please contact the Department of Conservation before bringing these, or any other non-listed species into Missouri.

Missouri has an especially diverse aquaculture industry making it difficult to describe a typical aquaculture business. Many individual businesses are listed in the directory under multiple categories because they sell a variety of products. The information in this directory was gathered by direct surveys to aquaculture producers, businesses and agencies listed in the '97 Missouri Aquaculture Directory and the list of Missouri aquaculture producers participating in the fish feed check-off program.

If you are involved in the Missouri aquaculture industry and not listed in this directory, please provide your information to the Missouri Department of Agriculture's Aquaculture Program.

MISSOURI AQUACULTURE ORGANIZATIONS

Missouri has one aquaculture producers' organization, the Missouri Aquaculture Association (MoAA). Originally organized as the Missouri Fish Farmers Association

(MFFA) in 1963, members voted for the name change to broaden the interests of the group and to unite all segments of the industry with one voice. The Mission of MoAA is to promote the success of aquaculture in Missouri. The Association serves the common interest of its members to represent and actively promote the causes and issues that affect the stakeholders in the industry. The Association will work to improve the quantity, quality, and efficiency of aquaculture production in an environmentally sustainable manner with maximum opportunity for profitability in all sectors of the industry.

Two other Councils interact with the industry in Missouri. The Missouri Aquaculture Council (MAC) was established by law in August 1989 to administer the "Aquaculture Marketing Development Fund." Each producer is required to pay to the Department of Agriculture a fee of \$3 for each ton of fish food used during the year. These revenues are used to promote aquaculture marketing activities for Missouri aquaculture. The directors of MAC are elected annually by contributing members. The Missouri Aquaculture Coordinating Council (MACC) was formed in 1994 as a result of the original Missouri aquaculture plan of 1981. MACC maintains a strategic plan for Missouri aquaculture, which identifies areas of the industry where development efforts should be focused. MACC operates under a Memorandum of Understanding between the Missouri Aquaculture Association; Missouri Departments of Agriculture, Conservation, Natural Resources, and Economic Development; and the University of Missouri-Columbia, College of Agriculture, Food and Natural Resources. Members of the Council include representatives from the Missouri Senate and House of Representatives.

A legislative change accomplished through Senate Bill 109 was passed in 1995, which classified aquaculture products as livestock. This bill has advanced the cause of the aquaculture industry by integrating aquaculture with traditional agriculture.

Missouri Aquaculture continues to have great potential for future growth. Interest in private recreation will increase baitfish and sportfish production and fee-fishing opportunities as a result of increased pressure on public recreation areas. The greatest opportunity for industry growth may be in the production of foodfish. A recent survey indicated large demand for farm-raised fish fillets concentrated especially around the urban regions of the state. Missouri aquaculture does not currently have sufficient production to meet this demand, but excellent land and water resources in close proximity to these markets could provide locally grown products. Development of regional fish processing, interest in value-added products, and greater customer awareness, as well as advancements in U.S. and world aquaculture could make Missouri aquaculture a significant segment of Midwest agriculture in the next century.

SPECIES AND ABBREVIATIONS

Listed by Family

Sturgeon and Paddlefish

shovelnose sturgeon	(sst)
paddlefish	(pad)

Gars

longnose gar	(lgr)
shortnose gar	(sgr)

Pike

northern pike	(np)
muskellunge	(mus)
chain pickerel	(cpk)

Trout

rainbow trout	(rbt)
golden rainbow	(grbt)
brown trout	(bnt)

Minnow

grass carp	(gcp)
goldfish	(gdf)
calicoe	(cgdf)
red fantail	(fgdf)
black moor	(mgdf)
shubinkin	(sgdf)
common carp	(ccp)
koi	(koi)
bighead carp	(bcp)
golden shiner	(gds)
fathead minnow	(fhm)
rosy reds	(rfhm)

Sucker

white sucker	(wsk)
bigmouth buffalo	(bbu)
smallmouth buffalo	(sbu)
blue sucker	(bsk)

Catfish

bullhead	(blh)
blue catfish	(bcf)
channel catfish	(ccf)
albino catfish	(accf)
flathead catfish	(fcf)

Livebearers

mosquitofish	(mos)
--------------------	-------

Bass, Sunfish, Perch, Drum and Cichlids

white bass	(wb)
hybrid striped bass	(hsb)
green sunfish	(gsf)
bluegill sunfish	(bsf)
longear sunfish	(lsf)
redear sunfish	(rsf)
hybrid sunfish	(hsf)
smallmouth bass	(smb)
largemouth bass	(lmb)
crappie	(cpp)
yellow perch	(yp)
walleye	(wal)
freshwater drum	(fdr)
*tilapia sp.	(til)

Non-Fish

crayfish	(cry)
bullfrogs	(bf)
tadpoles	(tad)
trapdoor snails	(tsn)

Listed Alphabetically

accf	albino catfish
bbu	bigmouth buffalo
bcf	blue catfish
bcp	bighead carp
bf	bullfrogs
blh	bullhead
bnt	brown trout
bsf	bluegill sunfish
bsk	blue sucker
ccf	channel catfish
ccp	common carp
cxdf	calicoe
cpk	chain pickerel
cpp	crappie
cry	crayfish
fcf	flathead catfish
fdr	freshwater drum
fgdf	red fantail
fhm	fathead minnow
gcp	grass carp
gdf	goldfish
gds	golden shiner
grbt	golden rainbow
gsf	green sunfish
hsb	hybrid striped bass
hsf	hybrid sunfish
koi	koi
lgr	longnose gar
lmb	largemouth bass
lsf	longear sunfish
mgdf	black moor
